## PERSONAL PROJECTS

- **Book Notes App** (Node.js, Express.js, PostgreSQL, EJS, CSS, JavaScript, PostgreSQL, APIs)  
Built a web app for creating, editing, and managing book notes with CRUD operations. Used PostgreSQL for data storage, integrated a public API for book covers, and implemented GET/POST routes for handling requests.  
<https://github.com/latolatto/BOOK-NOTES-APP>
- **Front-End e-Commerce Website Development** (HTML, CSS, Bootstrap, JavaScript)  
Developed a responsive e-commerce ticketing store with product listings, cart, local storage, and PayPal payment integration.  
<https://touristsolutions.info/>
- **Front-End e-Commerce Website Development** (HTML, CSS, Bootstrap, JavaScript)  
Developed a responsive e-commerce website for an online store, featuring product listings, shopping cart functionality, order processing using local storage and PayPal payment integration.  
<https://shopathletics.store/>
- **Joke Generator Web App using a public API and Node.js** (Node.js, Express.js, EJS)  
Built a web application that fetches jokes from JokeAPI using category selection and dynamic rendering for an interactive experience.  
<https://github.com/latolatto/joke-generator>
- **Front-End Website Development** (HTML, CSS, Bootstrap, JavaScript)  
Dynamic, responsive site for a marketing agency with interactive elements and contact form.  
<https://latolatto.github.io/hexa/>
- **Front-End e-Commerce Website Development** (HTML, CSS, Bootstrap, JavaScript, jQuery)  
Responsive platform for woodworking products with product listings, cart, and local storage processing.  
<https://drutech.co/>
- **User Authentication (Login And Sign-Up) Systems** (HTML, CSS, JavaScript, PHP & MySQL)  
Developed login/signup with authentication, validation, and secure database integration.
- **Form Handling And Validation Systems (Search & Submission)**  
(HTML, CSS, JavaScript, PHP, MySQL)  
Built secure forms for search and submission with real-time validation and backend integration.
